The Academic year

This year the new academic year started from 14th of February as directed by local government. We were planning to start bit earlier but was difficult due to snow and cold.

We had closed the academic year of 2024 with a final meeting with teachers and making a cheerful gathering at school with a small party. We all promised to reach school on the first day of new academic year. As per the promise of teacher we arrived school on 14th of February in new academic year. I had come to school on 5th of February to make the notice of new admission open.

On this we teachers were at school but there were only 7 students whose houses were nearby the school. We made new attendance register and talk with these 7 students and adjured.

On Sunday there were many parents at school with new pupils for admission in school but the number of present student was only 45% so the school was half run.

On feb-21 we had teacher meeting and made some strong decisions and plans:

1. We will try our best to make zero absent student in each class.
2. We will bring 100% result in school.
3. We will personally care the hygiene of each student.
4. We will not only teach the curriculum but also find out the hidden talent and creativity in each student.

We also made a plan to visit every village of Dandaphaya and search out the pupils who are in the age to go to school but not going to school so that we may help them to go to school.

Our average target was to bring at least 30 new pupils at school but at the end of March we reached 39 new pupils.

On March 14 we had meeting with the students of grade 8 of this year and we encouraged them to carry on their study and to be the changing pillar of dandaphaya in the future. They also promised us that in this year they will be the top student in Humla district and again make the school top.

March 28..

We had teacher meeting along with school management committee. I was informed bit earlier about the visit of Brigitte Mum and Mrs. Cornelia (A school's Principal in Germany). The meeting was called to discuss about annual function and its management from the side of school and parents to welcome both of them. We decided to prepare 9 dances from our student and a traditional dance from the side of parents.

April 4..

The classes were going smooth but I came to know that few of the students were not coming to school regularly. Soon on next day the parents of those students were called to school by me and had a meeting with them. They all clarified the reason of not continuing school of their Pupil and promised to send them school regularly.

April 16 to April 22

These were the days with Brigitte Mum and Mrs. Cornelia. Children were very happy and curious to be close to them.

Sponsor child were waiting for their letter and gift from Germany.

There were lots of work done at school... painting the wall of class room with new paint, distributing the clothes to students, distributing school sweeter to students, working in Garden..... it was a happy moment for students and their parents..

We had done a good preparation for annual function this year but unluckily the time went in too hurry and the programme was cancelled and we just did a small and very short.

We had teacher meeting with Brigitte mum and discussed a lot about the future of these students and also talked a bit about the future of this school too.

Finally they returned to simikot to catch their flight of next day morning. It was a bit emotional time to separation with the guest but we all shake our hands to say bye in the hope to see again next time.

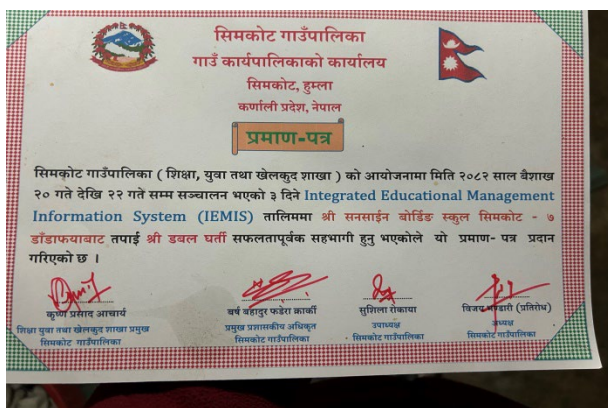

Working in garden... dug field, made rows for different vegetables..... planted cucumber, carrot, pumpkin.....

On May 2 we had a parents meeting with the students of grade 8 students. We informed the parents about the course book and also we came to know about their child while they are at home. The major question from the side of school to the parents was " how busy are their child at home with study?..... the answer was quite satisfying...

On May 2 I was invited by local government for a training on **integrated education management information system** which was going to held from May 3 to May 5.

On May 8 Pema Chhokey Lama a new teacher was introduced to school in the place of Vijaya Lama (primary level teacher) as he left the school to seek better opportunities in future.

On May 9 had teacher meeting to discuss about the first term examination. The meeting found that the course was completed to 40% in average and decided to run exam from May 20 to May 27 and publish the result on May 30 with the presence of parents and their respective Child.

On June 6 the teacher meeting was called after 1 o clock to analyze the result and find out the weak students in every class. The meeting went on for 5 hours. The analyzed data says that in total of 205 students, 6 students were absent in examination and out of 199 student 36 students were found below basic which is 18.09%. of total. 81.90% of student passed the first term examination.

The meeting decided to give extra focus to these 18 students in each class and wait for second term examination.

On June 8 again 2 new teachers were introduced to school namely Ghanshyam Oli and Bilbir Shahi. Ghanshyam Oli was introduced in the place of Pema Lama a English Teacher for Grade 3 to 8 and Bilbir Shahi was introduced in the place of Youbraj Shahi a Pre- Primary teacher.
